

## Revealing the Endodontists' Secrets – The Total Picture

Attend a One day Hands-On Course designed for the General Practitioner:

**Dr Mehdi Rahimi**

Mehdi graduated with a Bachelor in Dental Surgery with distinction from the University of Otago (New Zealand) in 2002 and received his Doctorate of Clinical Dentistry (Endo) degree from the University of Melbourne in 2008. Mehdi has been an associate lecturer at the University of Sydney since 2002, and a guest lecturer at the University of Melbourne since 2009. He is also actively involved in Endodontic teaching at various continuing education levels both nationally and internationally.

Mehdi has obtained a number of publications in the field of forensic dentistry and Endodontics (resin based obturation material and fractured instruments). In 2000 Mehdi was awarded the Sir Allan Wilkinson award for the most worthwhile research in Medicine and Dentistry from the University of Otago. He was also awarded the International Association for Dental Research young researcher's award in 2001. Mehdi is an honorary member of the Pierre Fauchard Academy, a member of the Royal Australian College of Dental Surgeons in Endodontics, a member of the Australian Asian Society of Dentists and the Australian Society of Endodontology.

**Dr Geoffrey Young**

Dr Geoff Young is a specialist endodontist practising in Strathfield. Geoff was awarded the University Medal with his dental degree from the University of Sydney in 2002, prior to completing his specialist training at the University of Melbourne in 2007. In 2011, Geoff became the first endodontist in New South Wales to obtain Fellowship of the Royal Australasian College of Dental Surgeons (RACDS) in the Special Field of Endodontics. Geoff is the current President of the Australian Society of Endodontology (NSW Branch)

having served on the Executive Committee for over 6 years. He is also an examiner for the RACDS (General Stream) and is involved in providing continuing education through the RACDS, University of Sydney, and the Australian Dental Association.

**This one day course is designed to enhance all aspects of your endodontic care, based on current evidence and best practice.**

A correct diagnosis, in combination with the right choice of new materials and techniques, will ensure an environment that offers an extremely high probability of success and a healthy apical periodontium.

The goal of this course is to provide participants with knowledge and skills to make the practice of endodontics simple and predictably successful.

This course will be presented in an interactive seminar which includes case based lectures and a practical component using natural teeth and plastic tooth models.

### Course Objectives:

- Endodontic access and length determination.
- Access (includes anatomy) and negotiation.
- Root length determination and how to optimise the accuracy of the electronic apex locator.
- Microbial control techniques: Chemo-mechanical preparation of the root canal system.
- Root canal preparation with various rotary nickel-titanium techniques with a focus on twisted files and twisted file adaptives.
- Irrigation and Medication – Traditional vs. Contemporary concepts.
- Current Obturation concepts and trends.
- There will be a particular focus on the modified warm vertical Obturation technique which will make obturation so much easier and more predictable.
- Management of difficult cases.
- Open apices - the role of MTA and various clinical applications for the general dentist, unusual anatomy (e.g. C-Shaped canals), procedural errors, and complications.

**This course carries 9 Continuing Professional Development hours.**

Participants are encouraged to bring accessed extracted teeth, as well as safety glasses and loupes. All other materials will be provided. Two posterior and two anterior teeth are recommended.
