

Minimal Trauma Apical Microsurgery

WITH PROFESSOR MAHMOUD TORABINEJAD, DMD, MSD, PHD

SATURDAY 21 AND SUNDAY 22 SEPTEMBER 2019

When non-surgical endodontic procedures fail, endodontic surgery is an alternative to extraction and placement of a partial denture, bridge or an implant. During the first half day of this two day course, Professor Torabinejad will discuss when to retreat and when to perform surgical endodontics. Various types of endodontic surgeries, including their indications, will be discussed. Steps in minimal trauma apical micro surgery (MTAMS) using innovative and new techniques and materials including flap designs, ostectomy, root end resection, root end preparation, root end filling, suturing and post-operative instructions will be presented. During the second half of day one of this course, the participants will perform modern surgical endodontics on mandibular and maxillary molars of specially designed models and then on day two will perform modern surgical endodontics on mandibular and maxillary molars in cadaver jaws.

Who Should Attend

This course is designed for endodontists, endodontic residents and others (i.e. specialists from other fields and some dentists who meet the requirements which are to be approved by the course convener).

Day One and Day Two

HANDS-ON WORKSHOP – Participants Will:

1. Learn how to perform MTAMS on mandibular and maxillary molars on specially designed models.
2. Learn how to perform MTAMS on mandibular and maxillary molars of cadaver jaws.
3. Learn how to perform some adjunctive surgeries.
4. Learn how to manage soft tissue.

Program Day 1

SATURDAY 21ST SEPTEMBER 2019

07:30am	Registration	01:30pm	Hands-on Workshop (limited to 20 participants and 7 postgrads to observe/help) Planned exercises:
08:00am	Welcome and Introduction	01:45pm	Demo: Minimal trauma apical micro surgery (MTAMS) on upper molars
08:15am	Lecture: Indications & contraindications of surgical endodontics	02:30pm	Hands-on upper molar MTAMS on specially designed manikins
09:30am	Lecture: Steps involved in MTAMS and adjunctive surgical procedure	03:30pm	MTAMS
10:45am	Morning Tea	04:00pm	Hands-on lower molar MTMS on specially designed manikins
11:00am	Lecture: Outcomes of non-surgical retreatment, endodontic surgery, replantation, transplantation & single implant therapy	05:30pm	Close
12:00pm	Q & A	06:00pm	Postgrad case presentation competition
12:30pm	Lunch		

Program Day 2

SUNDAY 22ND SEPTEMBER 2019

07:30am	Registration (limited to 20 participants)	01:00pm	Video & Live Demo: Lower molar
08:00am	Introduction to the day	02:00pm	Hands-on Lower molar MTAMS
08:15am	Video Demo: Upper Molar MTAMS	04:15pm	Lecture & Live Demo Soft tissue management tips
09:30am	Hands-on Upper molar MTAMS	05:00pm	Hands-on soft tissue management procedures
10:45am	Morning Tea	06:00pm	Close
11:15am	Hands-on Upper molar MTAMS continued		
12:00pm	Lunch		

About our Speaker

DR. MAHMOUD TORABINEJAD

is an adjunct professor of endodontics at the University of Pacific Arthur D Dogoni School of Dentistry and University of California in San Francisco, an Affiliate Professor in the Department of Endodontics, University of Washington School of Dentistry in Seattle and former director of the advanced specialty education program in endodontics at Loma Linda University School of Dentistry. He has made over 200 national and international presentations in more than 40 countries. He has authored six textbooks and more than 350 publications. He is the Number 1 author of citation classics in the field of endodontics and regenerative endodontics. He received the AAE Ralph F. Sommer Award in 1986, the AAE Louis I. Grossman Award in 1993, and he received the Philanthropist Award from the AAE Foundation in 1997. As an individual who had displayed leadership and exemplary dedication to dentistry and endodontics, he is the recipient of the Edgar D. Coolidge Award of the AAE in 2016. In recognition of his significant pioneering contributions to health sciences, he received the Loma Linda University distinguished investigator award in 2013. He is a past president of the California Association of Endodontics and past president of the American Association of Endodontists and its Foundation.

Hands-on Exercises

During the clinical exercises on Saturday 21 and Sunday 22 September 2019 Dr Torabinejad will be assisted by members of the Australian and New Zealand Academy of Endodontists in supervising a series of microsurgical exercises on human cadaver molar teeth. The two-day hands-on exercise workshop is limited to 20 participants, who will work in teams of two. Over the two days participants will both carry out and assist with periapical surgical procedures on posterior teeth.

EARLY ENROLMENT IS RECOMMENDED TO AVOID DISAPPOINTMENT.
