

ADVANCED ENDODONTICS HANDS ON COURSE

After sell-out courses in 2019, Dr Mehdi Rahimi and Dr Mark Johnstone brings this Comprehensive 2 Day Hands on Intensive to New South Wales to boost your Endodontic skills.

TOPICS COVERED:

- » Endodontic access (includes anatomy) and negotiation
- » Root canal length determination and how to optimise the accuracy of the apex locator
- » Microbial control techniques - Chemomechanical disinfection of the root canal system
- » Root canal preparation using various rotary NiTi instruments with a focus on protaper-next files and TF Adaptive files
- » Current concepts and trends in Obturation - focus is on modified warm vertical compaction techniques
- » Management of difficult cases and endodontic misadventures
- » How to avoid litigation in endodontics
- » Principles of endodontic retreatment and use of protaper retreatment files
- » Management of open apices and use of mineral trioxide aggregate

Hands On:

- » Locating MB2
- » Warm vertical compaction Obturation technique
- » Retreatment and removal of post core
